

5000+ subscribers threshold crossed

Sometimes today morning Oct 3, 2020 the number of subscribers on this blog crossed the threshold of 5000.

I thank you all of my subscribers for your interest in my blog and as I've described in the "Please read first" page, I promises to do all I can to provide you with the truth as I know it and hope it will be useful for you in improving your own lives.

<https://romeolupascu.net> is my personal blog part of the main domain I own

<https://timenet-systems.com> domain hosted on <https://hostmonster.com>

You can check the evolution of this site and probably check the articles beyond its life time (at some point I will not be able to pay for the hosting) by using the internet archive here https://web.archive.org/web/*/romeolupascu.net

I wish you all "Live long and prosper" and until this site will kick the bucket I hope to provide you with more useful information. This blog is not a daily blog, I'm trying to avoid creating more information overload so I will only post when there is something I believe is important to be said.
